PHILOSOPHY

Founded in 1947, Scorta Srl today has become a leader in the production of high quality thread cutting tools for the machining of internal and external threads.

Scorta's leadership in the field has been reached thanks to its longstanding experience in the industry, a mark of excellence which guarantees an increase in productivity, tool life and reliability in your manufacturing process.

The Scorta philosophy is to work closely with the customer in order to make improvements in the manufacturing process and provide the highest quality tooling possible. Through its technical expertise Scorta can recommend the right tool for the application.

From the initial design phase up to the the implementation on the machine Scorta ensures superior performance combined with cost savings to provide the customer with a confident solution to their external and internal threading requirements.

Whether it's tangential chasers, pipe taps or reamers Scorta ensures that each aspect of the manufacturing cycle is approached with the proper objectives in mind.

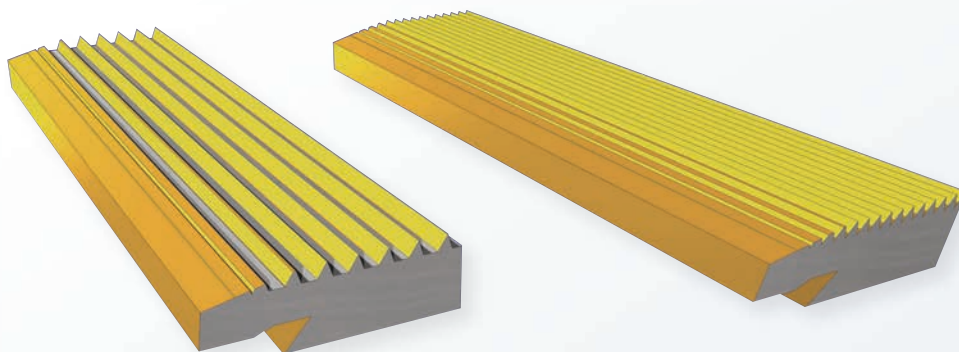

MATERIAL: Only the highest grade of HSS steel manufactured by the world's top steel mills is used in Scorta products. In house custom thermal heat treatment processes, guarantees consistency and quality throughout the entire manufacturing process.

PRECISION: The use of modern CNC machines tools, combined with Scorta's expert surface finishing techniques, ensure that products are manufactured under close tolerances.

TOOL LIFE: Different tool coatings are available in order to increase tool life and minimize tool wear.

QUALITY: The use of sophisticated CNC equipment and strict quality control measures ensures that tight tolerances and consistency are held on all tools manufactured.

TANGENTIAL CHASERS

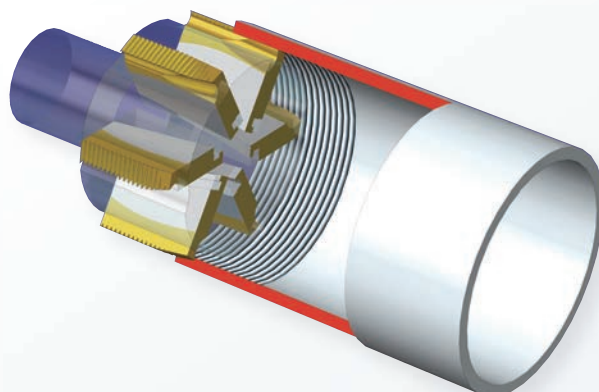

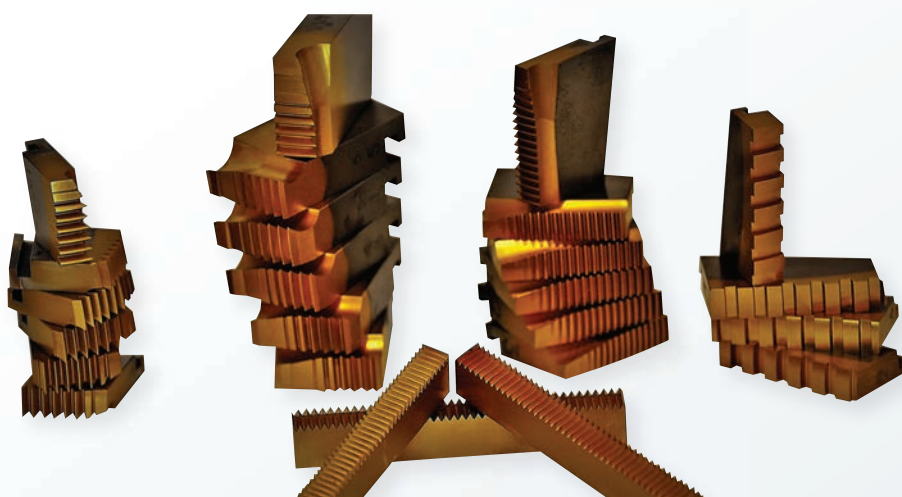

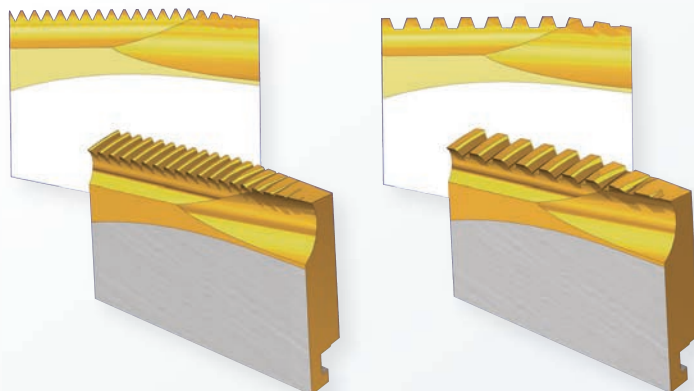

Chasers are available in full thread or drop tooth design.
Available for Landis and Wagner thread cutting die heads.

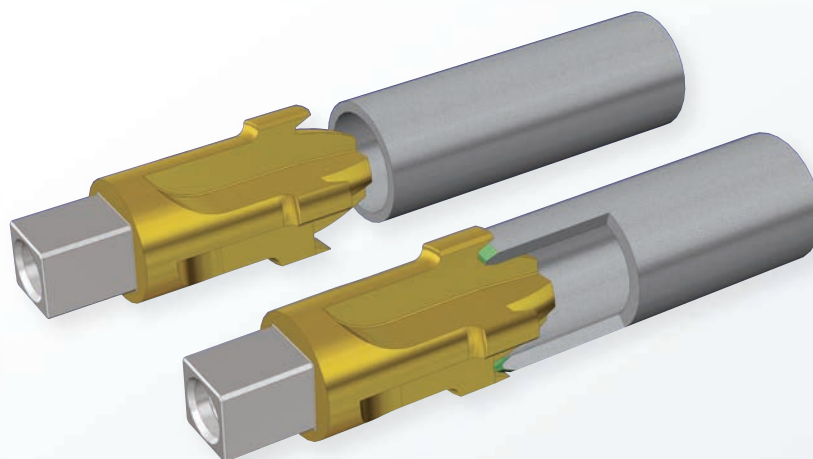

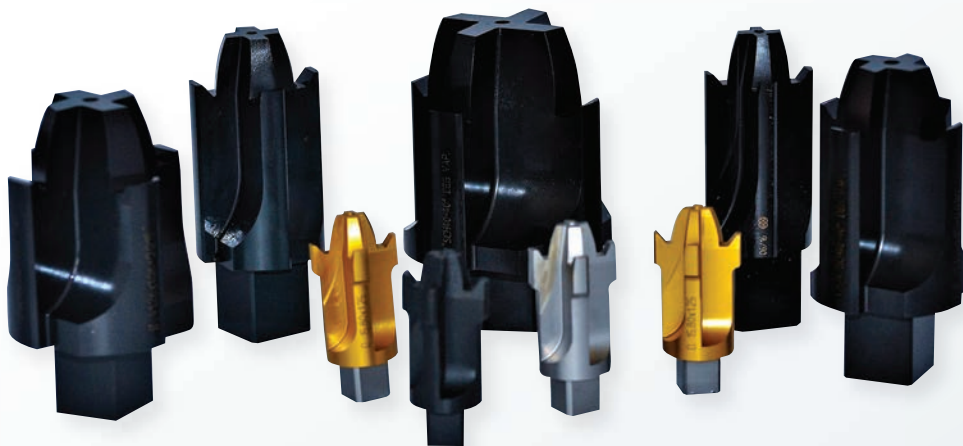

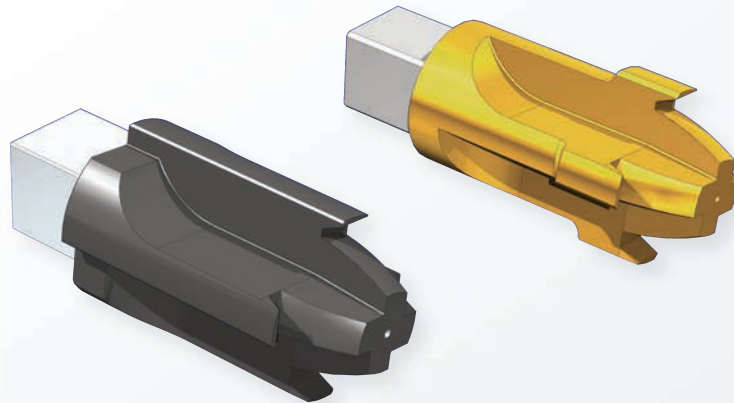

Metric, Inch, NPT, BSP and Acme pitches are available.
Specials upon request

COLLAPSIBLE TAP CHASERS

REAMERS

PIPE AND FITTING TAPS

Taps are manufactured to customer specifications ensuring proper fit to their machines and application.

Different coating and special designs available upon request.
